## Assessing Sustainability of Agricultural Systems: Balancing Context Specificity and Generality

**Author:** Vicent Gasso-Tortajada, Aarhus University Department of Engineering, Denmark

**e-ISBN:** 9788793237254

**Available From:** December 2014

**Price:** € 0.00

### Description:

Can we "measure" sustainability? Should we use global or local sustainability metrics? Where should we place the bar to consider a farm sustainable? How should metrics be designed to better enhance learning, consciousness change, and sustainability action? This PhD dissertation addresses questions like these and presents a rationale for balancing the level of context-specificity and -generality of sustainability assessment frameworks to effectively and efficiently assess and incentivise the sustainability of agricultural systems ranging from food to bioenergy production.
