

Insights on Education Reform in China

Authors:

Zhiying Nian, Beijing Institute for Lifelong Learning, Beijing Normal University, China

Qinhua Zheng, Beijing Institute for Lifelong Learning, Beijing Normal University, China
Li Chen, Beijing Institute for Lifelong Learning, Beijing Normal University, China

In recent years, as indicated by the fact that Shanghai earned the top-ranking PISA results in the world, China's education system has attracted more and more attention. China's education system has attracted the interest of researchers is that, since the late 1970s, China has initiated landmark reforms in education. Recent years have seen an increase in the number of English-language books on educational reform in China. Unlike those books, which examine macroscopic policies, this book examines the universalization of pre-school education, school selection in elementary education, attractiveness of vocational education, the operational mode of university charters, the development of open universities, the credit bank system in building the learning society, and other aspects of education, and only analyzes one specific problem in each of these contexts for the purpose of comparing China's educational reforms to their overseas counterparts through microscopic study.

Insights on Education Reform in China is not intended to provide a complete picture of China's educational reform. Rather, it addresses the types of complicated circumstances under which China has made achievements in educational reform, and the conflicts arising in the context of that reform. In this way, this book intends to express the thoughts of some young education researchers.
